DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Notice of Allowability

The Action of 23 September 2004 is hereby vacated.

Applicant's submission of 12 February 2007 has been entered.

Applicant submitted claims 53-69.

Claims 53-69 are allowed.. Claims 53, 63 and 67 are independent.

Reasons for Allowance

Applicant's amendment and remarks of 12 February 2007 are persuasive.

An updated search was carried out on 10-13 April 2007.

The prior art does not disclose and does not reasonably teach and suggest the combination of features present in each independent claims, including the steps of

- storing a first set of product data in the clearinghouse database, the first set of data being extracted from the merchant database;
- receiving at the clearinghouse site a first registration document that specifies a database format for use by the clearinghouse site in transmitting product data to the partner site, the registration document being transmitted to the clearinghouse site from the partner site via the communication network;

Art Unit: 3625

- using at the clearinghouse site the first registration document by placing a second set of product data, extracted from the first set of data stored in the clearinghouse database, into database fields that comply with the database format specified in the first registration document; and
- transmitting from the clearinghouse site to the partner site via the communication network the formatted second set of product data for storage in the partner site database whereby the stored, second set of product data is made accessible to a consumer visiting the partner site to thereby allow for viewing at the partner site of information concerning merchant site product offerings without requiring the consumer to visit the merchant site directly.

Discussion of Closest Prior Art

The closest US patent is previously cited Conklin (US 6338050). However, Conklin does not disclose and does not teach and suggest

- storing a first set of product data in the clearinghouse database, the first set of data being extracted from the merchant database;
- receiving at the clearinghouse site a first registration document that specifies a database format for use by the clearinghouse site in transmitting product data to the partner site, the registration document being transmitted to the clearinghouse site from the partner site via the communication network;
- using at the clearinghouse site the first registration document by placing a second set of product data, extracted from the first set of data stored in the clearinghouse database, into database fields that comply with the database format specified in the first registration document; and

The closest foreign patent is Bard et al., CA2237109, published 7 November 1998 in Canada. However, Bard provides no disclosure and does not suggest and teach the combination of features cited above.

The closest non-patent literature is "Thomson Financial Services Acquires EDI World, Inc.; Thomson Financial Publishing to Expand Electronic Commerce Initiatives", *Business Editors*. Business Wire. New York: Apr 6, 1998. pg. 1, downloaded from ProQuest on the Internet on 13 April 2007, 2 pages. However, the document does not

provide details and does not teach and reasonably suggest the combination of steps including:

- storing a first set of product data in the clearinghouse database, the first set of data being extracted from the merchant database;
- receiving at the clearinghouse site a first registration document that specifies a database format for use by the clearinghouse site in transmitting product data to the partner site, the registration document being transmitted to the clearinghouse site from the partner site via the communication network;
